

JUNE 2017

The end of the 2016/2017 low season for poliovirus transmission also marks the start of the next National Emergency Action Plan (NEAP), implemented via focused Emergency Operations Centres at national and provincial levels. Among key deliverables for 2017/2018 are implementation of nine high-quality Supplemental Immunization Activities (SIAs) with continued focus on the core reservoirs, closer coordination with Afghanistan, and implementation of a revamped High-Risk and Mobile Population (HRMP) strategy with the goal of ensuring vulnerable populations are systematically incorporated in micro plans and vaccinated.

No. of wild polio cases		No. of positive environmental samples		No. of infected districts (cases, environmental samples)	
June 2016	June 2017	June 2016	June 2017	June 2016	June 2017
13	3	62	49	17	13
0	0	N/A	4	0	1
0	1	12	6	3	3
4	0	15	14	6	4
1	0	N/A	N/A	1	0
7	0	11	5	5	1
1	1	24	20	2	3
0	1	N/A	N/A	0	1
